

Nordcon AG automates annual reporting through Aquin's RBK

Since 1st March 2007 Nordcon Investment Management AG generates its annual and semi-annual reports for all public and institutional funds at the push of a button, thanks to RBK. The annual report generator RBK automates the entire report generation process; from the incorporation and processing of fund accounting data to the ready-to-print report layout.

Andreas Schapheit, Manager Fund Administration of Nordcon Investment Management, explains: "We significantly reduced the processing time from the compilation to the finished layout of our annual reports. RBK's speedy integration of only 10 days was assured through highly qualified Aquin Consultants and through the market-proven standard interface to V3-Fonds".

As of 31st March 2007 NORDCON Investment Management AG, an institutional asset manager of the NORD/LB group, administered 7.4 billion Euro spread over 66 institutional funds, 8 portfolio and 3 advisory clients as well as 4 mutual funds.
